Project Description: The project involves the reconstruction of the road network in the area of the 'Dworzec Wileński' station in Vilnius, Lithuania. The project includes the reconstruction of the road surface, drainage system, and lighting. The project is being carried out by the Vilnius City Municipality and the Vilnius Regional Transport and Road Maintenance Department. The project is scheduled to start in the second half of 2010 and is expected to be completed by the end of 2011. The project budget is approximately 10 million Euro. The project will improve the road network, reduce traffic congestion, and improve the overall quality of the urban environment. The project will also improve the accessibility of the 'Dworzec Wileński' station and will provide a more pleasant environment for pedestrians and cyclists. The project will be implemented in several stages, with the first stage focusing on the reconstruction of the road surface and drainage system. The second stage will focus on the reconstruction of the lighting system. The project will be implemented in accordance with the requirements of the Lithuanian Road Construction Act and the Vilnius City Municipality's Urban Planning and Construction Regulations. The project will be implemented in accordance with the requirements of the European Union's Environmental Impact Assessment Directive and the Vilnius City Municipality's Environmental Protection Regulations. The project will be implemented in accordance with the requirements of the Lithuanian Road Construction Act and the Vilnius City Municipality's Urban Planning and Construction Regulations. The project will be implemented in accordance with the requirements of the European Union's Environmental Impact Assessment Directive and the Vilnius City Municipality's Environmental Protection Regulations.
